

CLIMATE CHANGE RESOLUTION 07-05

WHEREAS, the Chalkyitsik Village Council, is a federally recognized Tribe with all powers and responsibilities inherent in a sovereign government; and

WHEREAS, scientific consensus has developed that carbon dioxide (CO2) and other greenhouse gases released into the atmosphere have a profound effect on the Earth's climate; and

WHEREAS, in 2001, at the request of the Administration, the National Academy of Sciences (NAS) reviewed and declared global warming a real problem caused in part by human activities; and

WHEREAS, the 2001 Third Assessment Report from the International Panel on Climate Change (IPCC) and the 2000 U.S. Global Change Research Program's (USGCRP) First National Assessment indicate that global warming has begun; and

WHEREAS, 162 countries including the U.S. pledged under the United Nations Framework Convention on Climate Change to reduce its greenhouse gas emissions; and

WHEREAS, Alaska Natives have developed unique cultures based on the prevailing regional climate and climate change is likely to have significant impacts on the availability of subsistence food sources such as salmon, herring, whales, caribou, moose, seabirds and waterfowl, and will present serious challenges to subsistence ways of life in Alaska and other regions; and

WHEREAS, climate-related changes to the weather, food sources, and local landscapes undermine the social identity and cultural survival of Alaska Natives; and

WHEREAS, changes in climate will create new challenges for community health systems, rural infrastructure and economies; and

WHEREAS, unpredictable weather, snow, and ice conditions make travel and traditional hunting and fishing practices more hazardous and endangers lives; and

WHEREAS, actions taken to reduce greenhouse gas emissions and increase energy efficiency provide multiple local benefits by decreasing air pollution, creating jobs, reducing energy use, and saving money; and

NOW THEREFORE, BE IT RESOLVED, that the Chalkyitsik Village Council urges the United States Congress and President of the United States to move forward on a national, mandatory program to reduce climate change pollution and promote the development and adoption of renewable energy within a timeframe that prevents irreversible harm to public health, the economy and the environment.

Resolution #07-04

ENTITLED: To urge Congress and the President of the United States to move forward on a national mandatory, program to reduce climate change pollution.

- WHEREAS,** the Cheesh-na Tribal Council is a federally recognized Tribe with all powers and responsibilities inherent in a sovereign government, and
- WHEREAS,** scientific consensus has developed that carbon dioxide (Co2) and other greenhouse gases released into the atmosphere have a profound effect on the Earth's climate, and
- WHEREAS,** in 2001, at the request of the Administration, the National Academy of Sciences (NAS) reviewed and declared global warming a real problem caused in part by human activities, and
- WHEREAS,** the 2001 Third Assessment Report from the International Panel on Climate Change (IPCC) and the 2000 US Global Change Research Program's (USGCRP) First National Assessment indicate that global warming has begun, and
- WHEREAS,** 162 countries, including the US, pledged under the United Nations Framework Convention on Climate Change to reduce its greenhouse gas emissions, and
- WHEREAS,** Alaska Natives have developed unique cultures based on the prevailing regional climate and climate change is likely to have significant impacts on the availability of subsistence food sources such as salmon, herring, whales, caribou, moose, seabirds and waterfowl, and will present serious challenges to subsistence ways of life in Alaska and other regions, and
- WHEREAS,** climate-related changes to the weather, food sources, and local landscapes undermine the social identity and cultural survival of Alaska Natives, and

WHEREAS, changes in climate will create new challenges for community health systems, rural infrastructure and economies, and

WHEREAS, unpredictable weather, snow, and ice conditions make travel and traditional hunting and fishing practices more hazardous and endangers lives, and

WHEREAS, actions taken to reduce greenhouse gas emissions and increase energy efficiency provide multiple local benefits by decreasing air pollution, creating jobs, reducing energy use, and saving money.

NOW THEREFORE BE IT RESOLVED, that Cheesh-na Tribal Council urges the United States Congress and the President of the United States to move forward on a national, mandatory program to reduce climate change pollution and promote the development and adoption of renewable energy within a timeframe that prevents irreversible harm to public health, the economy and the environment.

Certification

We, the undersigned, do hereby certify that this resolution was passed and approved by the Cheesh-na Tribal Council by roll call vote on March 12, 2007 with 6 voting for and 0 voting against.

RESOLUTION 06-29

Resolution on Climate Change

Resolution of the Chuloonawick Native Village on Climate Change in Alaska

WHEREAS: that the Chuloonawick Native Village is a federally recognized sovereign tribe established in 1998 and we represent 88 tribal members in the Chuloonawick Native Village Tribe; and

WHEREAS: Alaska Natives have developed unique cultures based on the prevailing regional climate, and climate change is likely to have significant impacts on the availability of subsistence foods such as salmon, whales, caribou, seabirds and waterfowls, and will present challenges to subsistence ways of life in Alaska and other regions; and

WHEREAS: We are now aware of the threats of climate change in Alaska and how it is going to affect our way of life. As stated in the 2004 Arctic Climate Impact Assessment there is an international scientific consensus that carbon dioxide (CO₂) and other greenhouse gases released into the atmosphere have a profound warming effect on the Earth's climate. The 2001 Third Assessment Report from the International Panel on Climate Change (IPCC) and the 2000 U.S. Global Change Research Program's (USGCRP) First National Assessment indicate that global warming has begun; and

WHEREAS: Over the past 40 years, annual temperatures in Alaska have increased 4 degrees F and over the next 100 years, under a moderate emission scenario, annual average temperatures are projected to rise 5-9 degrees F over land and up to 13 degrees over the oceans; and

WHEREAS: Warming permafrost throughout most of Alaska is undermining Alaska's roads and utility infrastructure, pipelines and buildings, affecting the availability of groundwater and surface water, and contributing to increased erosion along coast and rivers; and unpredictable weather, snow and ice conditions make travel and traditional hunting and fishing practices more hazardous, thus endangering our lives; and

WHEREAS: Climate change is impacting entire ecosystems and is already threatening many species of Alaska wildlife by changing habitat, insect population, snow and ice cover, and unpredictable weather related to climate change; and that increased air and water temperatures are resulting in disease in plants wildlife and fish; and

WHEREAS: The increase in temperatures will result in significant sea level increases that will adversely effect Alaskan communities and ecosystems; and

WHEREAS: Climate-related changes to the weather, food source and local landscapes undermine the social identity and cultural survival of Alaska Natives and create new challenges for community health systems and rural infrastructure; economics that will be affected include Alaska's commercial fisheries, oil and gas development, tourism and timber harvesting, as well as the enormous cost of relocating flooded villages; and

WHEREAS: Action taken to reduce greenhouse gas emissions and increase energy efficiency provide local benefits by decreasing air pollution, creating jobs, reducing energy use, saving money, and preventing melting permafrost from eroding away homes, shorelines and entire villages; and

NOW THEREFORE BE IT RESOLVED: that the Chuloonawick Native Village urges the Alaska Congressional delegation, the United States Congress and the President of the United States to move forward on a national, mandatory program to reduce climate change pollution and promote the development and adoption of renewable energy within a timeframe that prevents irreversible harm to public health, the economy and the environment; and

BE IT FURTHER RESOLVED: that we also urge the Alaska State Legislature and the Governor of Alaska to promote the development and adoption of renewable energy within a timeframe that prevents irreversible harm to public health, the economy and the environment; and

Passed unanimously this 29th day of Dec. '06 by the tribal council of the Chuloonawick Native Village.

- WHEREAS:** Alaska Natives have developed unique cultures based on the prevailing regional climate and climate change is likely to have significant impacts on the availability of subsistence food sources such as salmon, herring, whales, caribou, moose, seabirds and waterfowl, and will present serious challenges to subsistence ways of life in Alaska and other regions; and
- WHEREAS:** climate-related changes to the weather, food sources, and local landscapes undermine the social identity and cultural survival of Alaska Natives; and
- WHEREAS:** changes in climate will create new challenges for community health systems, rural infrastructure and economies; and
- WHEREAS:** unpredictable weather, snow, and ice conditions make travel and traditional hunting and fishing practices more hazardous and endangers lives; and
- WHEREAS:** actions taken to reduce greenhouse gas emissions and increase energy efficiency provide multiple local benefits by decreasing air pollution, creating jobs, reducing energy use, and saving money; and

NOW THEREFORE BE IT RESOLVED: that The Native Village Eyak urges the United States Congress and President of the United States to move forward on a national, mandatory program to reduce climate change pollution and promote the development and adoption of renewable energy within a timeframe that prevents irreversible harm to public health, the economy and the environment.

CERTIFICATION:

I, hereby certify that I, Robert J. Henrichs am President of the Native Village of Eyak Traditional Council, and the Council consists of 5 duly elected members, and that this **Resolution No. 2007-02-09**, was considered and PASSED by the council on March 5, 2007 and that the vote was 5 For, and 0 Against, and 0 Abstaining and that the foregoing resolution has not been rescinded or amended in any way.
